

LOST WATER IS LOST OPPORTUNITY

February 25, 2016

As California struggles to recover from record drought conditions, environmental regulations to protect fish continue to force hundreds of thousands of acre feet of precious water to be flushed out to the ocean. Stormwater flows that could be captured, stored, and utilized for parched cities and farms are now simply being lost to the ocean.

Meanwhile, *residents, farms and businesses* are asked to **CUT BACK** and there is no scientific evidence to show endangered fish populations are benefitting.

THIS WEEK WE HAVE LOST...

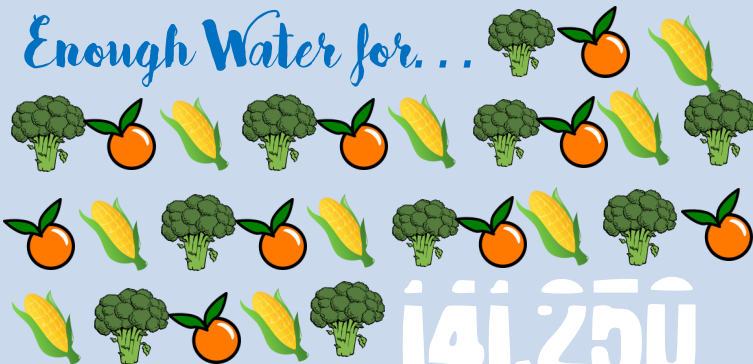

90,461 ACRE FEET

SO FAR THIS YEAR WE HAVE LOST...

565,000 ACRE FEET

DUE TO ENVIRONMENTAL RESTRICTIONS TO PROTECT FISH

Enough Water for...

141,250

acres of productive farmland[±]

&

4,380

jobs^{±±}

Enough Water for

1,255,555

families for 1 year^{±±±***}
