

LOST WATER IS LOST OPPORTUNITY

March 4, 2016

As California struggles to recover from record drought conditions, environmental regulations to protect fish continue to force hundreds of thousands of acre feet of precious water to be flushed out to the ocean. Stormwater flows that could be captured, stored, and utilized for parched cities and farms are now simply being lost to the ocean.

Meanwhile, *residents, farms and businesses* are asked to **CUT BACK** and there is no scientific evidence to show endangered fish populations are benefitting.

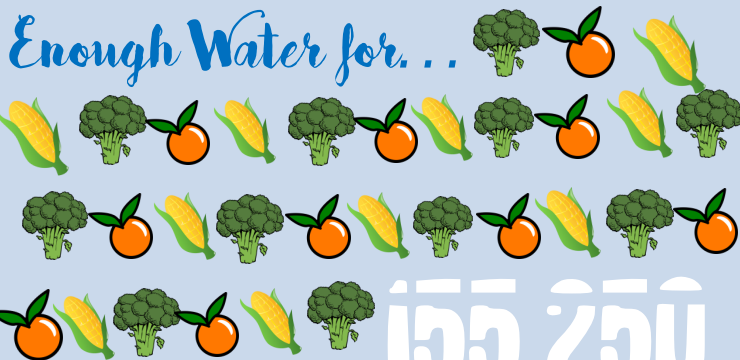

THIS WEEK WE HAVE LOST...

SO FAR THIS YEAR WE HAVE LOST...

56,000 ACRE FEET

621,000 ACRE FEET

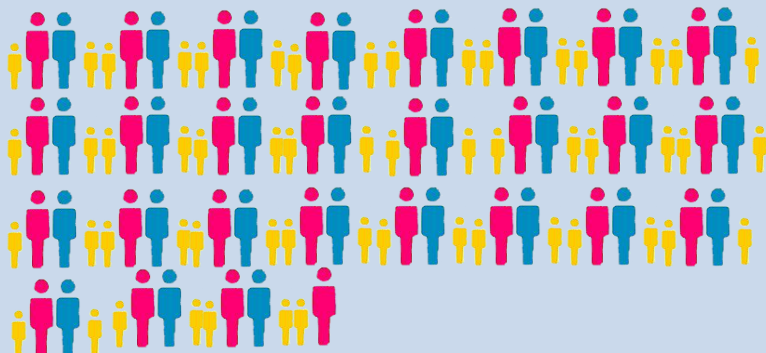

DUE TO ENVIRONMENTAL RESTRICTIONS TO PROTECT FISH

155,250 acres of productive farmland[±]

4,813 jobs^{±±}

Enough Water for

1,380,000

families for 1 year^{±±±***}
