

# LOST WATER IS LOST OPPORTUNITY

April 21, 2016

As California struggles to recover from record drought conditions, environmental regulations to protect fish continue to force hundreds of thousands of acre feet of precious water to be flushed out to the ocean. Stormwater flows that could be captured, stored, and utilized for parched cities and farms are now simply being lost to the ocean.

Meanwhile, *residents, farms and businesses* are asked to **CUT BACK** and there is no scientific evidence to show endangered fish populations are benefitting.

THIS WEEK WE HAVE LOST...

SO FAR THIS YEAR WE HAVE LOST...

53,000

1,049,000

## DUE TO ENVIRONMENTAL RESTRICTIONS TO PROTECT FISH

Enough Water for...

262,250

acres of productive farmland<sup>±</sup>

&

8,132

jobs<sup>±±</sup>

Enough Water for Approximately...

2,331,111

families, or

9,324,444

individuals for 1 year<sup>±±±\*\*\*</sup>

COALITION FOR A SUSTAINABLE DELTA  
SOLVING THE SACRAMENTO-SAN JOAQUIN DELTA CRISIS

\*\*\*The average California family of four consumes 146,000 gallons, or 0.45 acre feet, of water per year  
±One character equal to approximately 5,000 acres  
±±Assumes 129 af of lost water results in 1 lost job  
±±±One character equal to approximately 100 lost jobs  
±±±±One character equal to approximately 50,000 families
